# AMERICAN DEXTER CATTLE ASSOCIATION

Route 1, Box 378  
Concordia, MO 64020

## OFFICERS

### President

Philip R. Martz  
R D 4, Box 162  
Berlin, PA 15530  
(814) 267-5052

### Vice President

R.S. Springer  
708 Inverness Rd  
Ft. Collins, CO 80524  
(303) 484-2711

### Secretary/Treasurer

Rosemary Fleharty  
Rt 1, Box 378  
Concordia, MO 64020  
(816) 463-7704

## FEE SCHEDULE

### Cost of Registrations:

Cows up to 1 year old	\$10.00
Bulls up to 2 years old	10.00
Cows over 1 year old	20.00
Bulls over 2 years old	20.00

### Cost of Transfers:

Regular Transfers	\$10.00
Inner-herd Transfers	5.00

Registrations & Transfers for non-members \$50.00

**Note: Names of animals to be registered cannot exceed 21 letters.**

New memberships in ADCA (for individuals who own a registered Dexter) \$30.00

Annual renewal of dues (for Dexter owners). 20.00

Associate Members (Bi-Monthly Bulletin only). 10.00

## FROM THE NEW REGION #3:

Welcome from the northwest! As the new year starts, we have some real changes for our region. With the new director for the southwest, and Jack Goodman getting Oregon, we are now Alaska, Hawaii & Washington. But I want to thank all the members from the old Pacific region for all the support they gave me in setting up meetings and hosting them. A special thanks to Mr & Mrs Tom Dodson and Mr & Mrs Wes Patton for hosting the California meeting last May, Mr & Mrs Fred Colclough for the Washington meeting, and Mr Roy Atherton for the Oregon meeting. The members that were able to attend these meetings, I am sure, learned as much as I did. To the members who went many miles to the meetings, Thank You. I have learned a lot and will never forget you. Thank you all.

Due to an early winter setting in and then leaving, we did not have a fall meeting, but have one being planned for April. I will let you know when and where after the first of March. I will be looking forward to seeing all of you at that time.

1990 Was a good year for the Dexter breed, and I hope that all of you have a successful 1991 with your Dexters. Good luck, and I hope that I will see all of you from our new region at the next meeting. Happy Dextering in 1991!

Bonnie Boudreau, Director

\* \* \* \* \*

## FROM THE NEW REGION #9:

Recently, Rosemary sent me official word that I am the director of the newly formed Region 9, including Arizona, California, Nevada, New Mexico and Utah. I am pleased to serve the breeders of my region, and hope that I can do them justice.

Although I am a relative new-comer to the Dexter breed, I have had an opportunity to visit with people in several states, either in person or over the phone, about these interesting, useful cattle. As a matter of fact, my wife Jane and I talk to at least two people each week and have visitors to our farm each month. It is fun to meet people of diverse backgrounds who have a common interest in our breed.

Last spring, we held a field day at Chico State University and hope to do the same thing again this year. The exact date has not been cleared yet, but I will be getting a newsletter out to members in my region as soon as I know for sure. It will definitely be before June, so that the concerns from our region can be voiced at the national meeting in June. I would like to hear from members in region 9 to determine an appropriate program for our field day and to know of any new people interested in Dexters.

Wes Patton, Director

\* \* \* \* \*

## FROM THE EDITOR:

Please note that, with one exception, the time has run out with this issue for those of you who purchased ads for a year, cattle and/or semen. If you wish to continue your ads or make any changes in them, the DUE DATE is APRIL 1st.

The directory page is up-to-date, showing all revised or newly formed regions, and all newly-elected directors. Please check to see whether or not your region may have changed.

Apologies to Ruth Dunn - I gave the region, but did not give her name on the Green Chimneys article - last issue.

*L.J.*

## LETTER FROM THE PRESIDENT

Report on the Phone Conference, December 2, 1990:

1. John Hays made a suggestion that we buy the new book, "Kerry and Dexter Cattle" and resell it.  
The board has decided that each board member should receive a copy to read and review before any purchase is made for the purpose of reselling.
2. Do we need an amendment to our By-Laws indicating that no two persons from the same corporation or family can hold office at the same time?

This will be resolved by a vote among the members. Rosemary shall send ballots out within 60 days from the date of the Bulletin. The votes will determine whether or not two persons from the same corporation or family can hold office coincidentally.

3. There was discussion concerning the letter from Canada regarding voting and fees.

It was decided that the president should send a letter to the CDCA indicating the need for a reciprocating agreement with them. The objective is to allow the CDCA to do in America what the ADCA is permitted to do in Canada.

A response to this suggestion by the CDCA is expected to return within sixty days of the post-marked date of the president's letter.

4. Do we need some type of certification for associate members?

The board decided to offer herd books at the price of \$10.00 plus postage for members and \$20.00 plus postage for non-members. Rosemary will put these on sale in future Bulletins.

5. Clarification of voting for Peerless Herd was also discussed.

Rosemary will be sending a letter to the Peerless herd to ascertain who the voting members are.

6. Mrs. Crapp's letter to the officers and directors was deliberated. Her letter stated that she would like the ADCA to require the Canadian Dexter owners to register their animals in Canada before they are registered in the U.S.

The board has decided to table the request until a response is obtained from the CDCA concerning the reciprocating agreement.

7. Do the officers and directors need liability insurance?

Jim Johnson will acquire calculated cost figures and send them to the board and to the officers for further discussion.

### OTHER MATTERS:

The board directed the president to send a letter to various magazines with a list of the current directors and officers. Also, he is to encourage those with questions or those needing information to contact their area directors. A copy of the map with this information is to be sent upon request.

It was also decided that a short-term loan be taken out to finance the computer, to be paid back as soon as possible.

## LETTER FROM THE PRESIDENT - - cont.

We will be going back to the old type registration certificates.

The results of the election of directors are as follows:

Region #4	Mary Springer	10 votes	1-yr term
Region #9	Wes Patton	13 votes	1-yr term
Region #10	Clifford Heistand	9 votes	3-yr term
Region #11	Sophia Stillerman	16 votes	3-yr term
Region #13	James R Donovan	15 votes	3-yr term
	W.B. Goodson	1 vote	
	Patrick Mitchell	4 votes	
Region #12	position vacant		

We are still endeavoring to encourage members from Region #12 to run for Director. Any member interested in serving as director should give me, Phil Martz, a call at (814) 267-5052.

I would like to thank all members for their participation in the election. Congratulations to those who were elected. I am looking forward to working with you. If you have any questions as to your duties or obligations, please contact me.

I encourage anyone, who is interested in receiving information on cattle and any which may be for sale, to contact the director in his or her district. In the event that a response is not given, please contact one of the officers.

I trust everyone is planning to attend the annual ADCA meeting to be held in Tyler, Texas, at the Ramada Hotel from June 14-16.

## Meeting location:

Ramada Hotel  
5701 S Broadway  
Tyler, TX 75703

(903) 561-5800

## Meeting Host:

Harry E Julian  
Rt 1, Box 396  
Wills Point, TX 75169

(214) 865-8871

This is going to be a very educational and pleasurable meeting. I hear great comments about Texan Hospitality! !

Philip R Martz  
President ADCA

## THE BOOKSHELF

\*\*\*\*\*

\*

DEXTER CATTLE by John Hays - USA

\$7.95 per copy plus \$1.55 postage  
and handling.

Order from:

Rosemary Fleharty, Sec  
Route 1, Box 378  
Concordia, MO 64020

\* THE DEXTER COW AND CATTLE-  
\* KEEPING ON A SMALL SCALE  
\* by Dr William Thrower - England

\* \$9.00 ea, post paid. Order from:

\* Rosemary Fleharty, Sec  
\* Route 1, Box 378  
\* Concordia, MO 64020

\*\*\*\*\*

## FROM THE SECRETARY:

Dues are payable as of January 1, 1991 - - annual renewal is \$20.00. Any member with dues unpaid by March 31st will be removed from the active membership list. Please check the By-Laws. Only members with cattle are considered full members of the Association. Other members (who do not own cattle) are considered Associate Members - dues for Associate Members are \$10.00 per year. Associate Members will receive only the Bulletin, (not the Membership book or Herd book).

Cost of additional Herd books is \$20.00 plus postage for members (Associate or Full).

Cost of additional Membership books is \$10.00 plus postage for members (Associate or Full).

Please check over your white applications for registration. Almost one-third of all applications received are having to be returned. Please check over fees - - many papers are received without sufficient funds. Make sure that all animals have a tattoo number. Check to see that birth dates are filled in, and that all signatures are included. Also, names cannot exceed 21 letters. Almost 150 applications for registration were received the last week of December. The above type of errors only delays completing the paperwork.

Also, if you are giving out information on the Association to prospective owners and members, please be sure you are giving out correct information. Many prospective members are receiving information that does not include information about Associate memberships. Only individuals owning cattle can be full members. I am having to return three to four checks a week because people are mis-informed.

Your Secretary needs your help!

Thanks,  
Rosemary

TATTOO LETTER FOR 1991 is "A"

\* \* \* \* \*

Last issue, we mentioned the calf roping contest for the kids at the fair. Shep Springer purchased 6 calves from Bill and Hilary Bledsoe to donate for the purpose. The 6 calves were off-spring of the Dexter bulls crossed with 1st-calf Gelbvieh heifers in the Bledsoe herd. The calves were weaned at the same time Bill delivered them on Sept. 13th. They had been fed no grain or hay prior to delivery. Shep says they weighed an average of 326 lbs at that time.

Shep kept the calves for 59 days before they were distributed to the contest winners. He fed them about 4 lbs of grain per day, and grass hay at one feeding and alfalfa hay at the other. During that 59-day period, the calves gained 106½ lbs. That is 1.80lbs per day gain, a remarkably high rate of gain for calves just weaned.

Shep feels that this information, while limited, is a good selling point for the use of Dexter bulls for elimination of calving problems with first-calf heifers. He does feel we should be selctive in the bulls we promote for this use. We need to promote the use of the longer legged, taller type animals as that is the type calf that is in demand as feeder calves, at least in our area.

I will be able to check on the calves occasionally and will be able to get information as to weight gain, etc. Also will get to see the carcasses and how they grade and yield after slaughter.

I do hope anyone who has the opportunity to collect any such information on Dexter/cross calves will do so as it is information the cattle producers will want before becoming very involved with the use of Dexter bulls.

Shep Springer      Ft Collins,      CO

FROM MISSOURI:

After reading Don Piehota's and Fred Chesterley's letters in the past two Bulletins, I wonder if it is not time for the Dexter Cattle Association to have a research committee to find and publish more facts about breeding and raising Dexters. I agree the bulldog is our number one problem. We had one Missouri breeder last year who owns five cows, three short-legged and two long-legged cows. All three of his short-legged cows had bulldogs in one year.

A couple of years ago, Harry Julian and I were sharing our experiences about breeding long-legged Dexters down in size without using the bulldog gene when Harry told me about feeding some of his long-legged steers and how well they had done. Now, I have to admit at the time I was a little skeptical. I guess I still believed that if it weren't for the bulldog problem, the short-legged Dexter would make the better beef animal.

With Harry encouraging me, I put two of my smaller long-legged steers on feed. I selected two steers at ten months of age weighing about 350 lbs. and fed them for eight months up to over 600 lbs live weight. For the first 4 months, I backgrounded them on hay and limited grain, but by the end of the 4-month period I had them on full feed (all the corn they would eat and three quarters of a pound of protein per day), and they were full fed for at least 4 months. Six weeks before we had them slaughtered, I had our livestock specialist come look at them. He advised 6 more weeks of feeding - - it helps to have expert advice at times.

These two steers both graded choice with yield grades between 1 & 2 - - 2 is considered excellent. The carcasses averaged 333 lbs. each. We kept a half and three other families each got a half. We have gotten feedback like "it is some of the best beef we have ever had", "the size of the cuts is just right", "the smaller halves - about half the size of a normal beef - are more affordable". I have been eating Dexter for 20 years, but none this good. I had never fed a steer all the way out for fear that there would be a lot of waste fat - - there was none in these two steers.

I would like to see some research done on this kind of thing. It would give our breed a lot better image than does the bulldog problem.

Dean Fleharty

\* \* \* \* \*

FROM INDIANA:

"How did you get a copy of that article?" This, from Duane Siders of LaGro, Indiana. "It sure surprised me to see it in the Bulletin".

Duane is referring to the item about his "Chief" and Peggy, the heifer calf raised by Levi Stutzman. "In a short interview, I gave the reporter all the information I had collected over the past five years about Dexters. She got most of her 'facts' from that, and not me. I have had several people stop to see my cattle since the article, and hopefully, some of them will get the bug to start raising Dexters.

Peggy had a pretty little bull calf on August 21. I made a steer out of him, and he's really doing well. I put my bull "Chief" out in the pasture with them the first of October, and am pretty sure she got bred on Oct. 14th.

The Indiana Zoo brought their heifer "Deidra" up on Oct 12th to be bred to my bull. She cycled the weekend of the 21st. We are going to keep her until the end of November.

Back to that first question - my cousin Rose lives with us, a native Hoosier. A friend of hers cut out the article from their local paper and sent it to her!

*Editor*

## CANADIAN GROWTH CURVE PROJECT - - DEXTERS

December 10, 1990.

To: The American Dexter Cattle Association

Subject: Growth curve measuring project

I am happy to announce that a research program on Dexter cattle is being sponsored by the Quebec Minister of Agriculture. This project consists of developing a growth curve using height/weight information provided by Dexter breeders. For the time being, this program involves only female long-legged proportionate type Dexters. If there is enough interest and participation, we will try to expand it to bulls.

Since the population of Dexter animals is small, and considering the need for as many sources of information as possible, we are requesting the assistance of ALL Dexter breeders. We thought that the best way to reach them was through their national newsletter. You will find attached the pertinent documentation to be published.

The subsequent results of this research will be available for publication in your newsletter for the information of all Dexter breeders. Furthermore, each breeder who contributes data will receive confidentially a growth curve for each animal submitted.

We understand that this project is the first one of its kind. If the response is satisfactory, we are of the opinion that the results will be of great interest and benefit to all Dexter cattle breeders.

Yours truly,

  
Jean N. Ouellette  
La Ferme du Héron Bleu

This project has received the approval of the Canadian Dexter Cattle Association.

Winona Crapp, Secretary

## EDITOR'S NOTE:

Mrs. Winona Crapp, Secretary of the CDCA has sent us information concerning a Growth Curve Measuring project on Dexter cattle, sponsored by the Quebec Minister of Agriculture.

The project is to last for 1 year, but nowhere do I see an opening and closing date. Mr Ouellette's letter (left) is dated Dec.10,1990, so one would assume the project is for 1991.

Below is a glossary of terms (French) translated for ease of reading the forms.

All correspondence from the Quebec Minister of Agriculture will be in French. Below is a small glossary of terms which will allow you to read your report without trouble.

Feuille de prise de données sur les génisses	Fact Sheet
Nom de la ferme	Name of farm
Date du contrôle	Date of the measurements
Fait par	Made by
Nom de la génisse	Heifer's name
Date de naissance (année-mois-jour)	Date of birth (year-month-day)
Age (mois)	Age in months
Poids	Weight
Poids moyen	Average weight
Hauteur	Height
Hauteur moyenne	Average height
Courbe des poids	Weight curve
Courbe des hauteurs	Height curve
Courbe de croissance	Growth curve

## GROWTH CURVE MEASURING PROJECT - DEXTERS

RULES & REGULATIONS

1. Only registered, long-legged, proportionate type females are eligible.
2. All ages are accepted, but emphasis is on two-year olds and under.
3. Multiple measurements are also encouraged. For example, you can submit measurements of the new-born heifer and continue sending in her measurements at various stages of growth, say every three months. It is these early stages of development that are very important in establishing the growth curve.
4. A photocopy of the registration certificate of the participating animal(s) must be sent with the first fact sheet or the data will not be used. For any subsequent measurement of an animal, reference to its name and number is sufficient.
5. Each breeder who sends in information will receive a CONFIDENTIAL report for his/her animal(s).
6. The weight measurement can be taken with a scale or by using a good quality teflon tape (not the paper kind given free by feed dealers).  
  
Height measurements should be made on a level surface using a good quality caliper.  
  
You may use either inches or centimetres and pounds or kilogrammes. Your confidential report, however, will be in kilogrammes (kg) and centimetres(cm).
7. The attached fact sheets are to be filled in and forwarded to:  
  
Gouvernement du Québec  
Ministère de l'Agriculture, des Pêcheries et de l'Alimentation  
Bureau de renseignements agricoles de Granby  
77, rue principale, local rc 21  
Granby (Québec) J2G 9B3  
Att: Michel Boisclair, agronome  
  
All information and fact sheets forwarded will become the property of the Minister and will be destroyed at the end of the project.
8. The project will last for one year, after which an extension to the program will be considered.

## EDITOR'S NOTE:

Mrs Crappe has kindly included with her letter copies of all forms necessary to the project.

Therefore, your editor will be happy to make copies and supply them to any breeder wishing to participate in the program.

The drawing, lower left, shows exactly where to measure.

If you have any questions concerning this program, I would suggest you contact Mrs Winona Crapp directly at:

Rt 1  
Keene, Ontario  
Canada KOL 2G0

Phone:  
(705) 295-6536

---

Measure for height straight up  
front leg to top of shoulder.

Measure for weight around heart  
girth.

**FROM JOHN HAYS - COMPTCHE, CA:**

"I believe mention should be made in the Bulletin of an article in the December issue of "The Ark" (the monthly publication of the British Rare Breeds Survival Trust) entitled "Embryo Transfer from Dexters - a World First" detailing the success of Mrs Jayne Paynter, the best known breeder of Dexters in England, in producing, in August of 1989, the first Dexter deriving from a frozen embryo. A Jersey cow was the recipient.

At the time the article was written, three more had been produced, and by the time it appeared in "The Ark", Mrs Paynter had reported "two more pregnancies out of four fresh embryos and two out of three with frozen embryos."

Although the underlying purpose of the project was to permit the exportation from England of frozen embryos, this plan has been "suspended" until there is more certainty about (Britain's) future export regulations."

# DEXTER SEMEN FOR SALE
