LETTERS TO THE EDITOR

YOUR OPPORTUNITY TO SHARE VIEWS AND OPINIONS REGARDING ISSUES
PERTAINING TO DEXTER CATTLE AND OUR ASSOCIATION. NO PERSONAL ATTACKS.

Another Opinion....

In the January / February issue of the bulletin, there are a number of letters about both the polled aspect and the fee structure. I will treat the polled comments.

Mr. Johnson, "A polled Dexter has to be crossed --". No, mutations have existed down through the ages. Most mutations are lethal. I can only guess that polled mutation was lethal until man wised up and protected the polled animals. It was his advantage to do so. Today scientists can not only tell you that there are mutations, but that in a population of say ten thousand horned European cattle, you can expect so many polled mutations. It is that well researched.

In England there are two strains of polled Dexters. One is due to breeding up and the family tree shows EX on the animals that were used for breeding up. The other line there is no breeding up, and the family tree is clean of all EXs. The semen we brought in is from the non EX line.

Incidentally, I have the greatest respect for the Brits and their saving the Dexters. The breed was almost gone when the Rare Breeds Survival Trust took on the task of saving the breed. Because numbers were so low they allowed breeding up, but they established standards, Dexter standards - size, docile, easy calving, dual purpose, and hardy. Today the majority of British Dexters are what are called middle legs. They aren't dwarfs, nor are they long leg Kerry. The Brits have done just what the Chico geneologist told us some years ago, "If you want a small animal that breeds true, take your proportionate animals and breed down, you will never get it from dwarfs."

Mr. Johnson also says that we don't need polled animals, we accomplish the same with dehorning. Look at it this way, you can remove horns either surgically

or genetically. Surgical removal is a shock to the animal, it costs money, and there is always the risk of infection. Put very simply, Mr. Johnson, which would you prefer, to be born with a mole that has to be surgically removed, or to be born without a mole? Another point you might think about is that there are animal rightists and humane societies that regard dehorning as inhumane. With all the other nutty laws that have been passed, we may find that we suddenly can't surgically remove horns.

Ms. York is concerned as to how she can be assured that she won't corrupt her horned animals by inadvertently getting a polled animal. The answer is that polled animals carry a letter "P" after their registration number. Also, the genetics for polled follow the same rules as color. If you have dun cows and use a dun bull, you will get dun calves. In other words, if a calf has horns, it does not have the polled gene. Like black, the polled gene is dominant. However, using horned on horned doesn't guarantee that you won't get a polled calf. Mutations are like lightning and you never know where or when it will strike next.

As for toothless dogs, I haven't got any. My dogs have their teeth, but I don't have a Doberman, a Rottweiler, Pitbull, or wolfdog!

Getting back to a more serious vein, just because you have had gentle, docile, easily handled Dexters doesn't mean that it is going to stay that way. Some years ago a bull was imported that was genetically vicious. He was a Jersey in disposition. He has sons who have made a reputation, and now there are grandsons. Yes, he is on A.I. and available from coast to coast. So watch it!

As I read the letters, I have a feeling that somehow people regard the polled version as an attack against the horned. The argument isn't about the right to

remove the horns, that has already been decided. The argument is about how the horns are to be removed. Those wanting horns aren't affected.

F.D. Chesterley

A Couple Of Ideas

Just a note with a couple of ideas. First being on horns verses dehorned.

If a member has a fear of horns, or prefers dehorned animals, great. Dehorn them. That's their choice. Our family prefers horned animals. Great, leave them on. This is our choice.

We have raised Dexters for 5 yrs. We have three daughters ages 15, 12, & 9. We have never had a cow or bull intentionally or unintentionally gore one of us.

Like with any breed of animal, there are always differences in the characteristics people like. Everyone can have their own likes without pushing theirs on someone else.

If polled animals are to be, then have a separate division or registry for these animals. That way we can be assured of getting the characteristic we like.

One other idea on raising funds for ADCA would be merchandising t-shirts, sweatshirts, hats, etc. I know this helps in other breed associations we belong to.

Gail Brinkley

A Reply

Dear Sandra:

Like you and Bob, I am another unhappy member. I see things I believe need changing and they aren't changed. Why? Our membership is quite diverse. There are those who are members only to be able to register their animals and they ignore the association until suddenly the fees for registration are doubled and they wake up. After they have adjusted to the new fee schedule they will have another relapse into indifference until the next surprise. All-ways they are indignant, why aren't we consulted? It was on the agenda, it was discussed and debated and voted on. The question they should ask is, "Where was I?"

There are those who believe that they are custodians of an antique. They want to block any and everything because it might change their antique. Dexters are perfect and unimprovable so we must stop everything. They wake up suddenly when something pops up that is new to them. How did this happen, such as polled Dexters. Polled Dexters aren't real Dexters, real men don't eat quiche, etc. As an aside, I think polled Dexters are real Dexters, and I like quiche. My wife makes super quiche!

How do these surprises happen? They happen not because the board failed to function, they happen because we, the members, failed to function. We scream with anguish after the horses have gotten out of the barn and then we leave the barn door wide open. For example, isn't it time that we legislated a rule that no increase in fees can be made unless there appears a notice to the members in the bulletin six months prior to the annual meeting. The amount of the increase need not be stated, just that a change in the fee structure will be on the agenda. That should get members talking to their director and each other as to how much, etc.

Last month I received a letter from President Patton asking me, and I presume all the other

directors, for items for the agenda of the annual meeting. Being a new director I have no idea if this procedure is long standing or new. All I know is that the President has started the ball rolling and it is now in the local court. That means that you inform your director what you want. Don't cry over spilt milk, rather how to improve things. Remember when you spill milk you don't scoop it up off the counter and floor and put it back in the bottle. You do whatever to avoid spilling more. Also remember that what you want carries no weight unless you can persuade the majority of your district members that they want what you want, then the director can act.

Sincerely,
Frederick D. Chesterley
Director District 3

Association**

Region 5 News and Views

Vol 2, March, 1995

Carol Davidson, Director

Reminder Reminder Reminder

International Dexter Field Day, Cow Palace, Olds, Alberta, April 15, starting at 9:30 a.m.

It looks as though we shall have Dexter addicts from all over, including New Brunswick, Alaska, Colorado, and Oregon. This is one Dexter event you won't want to miss!

Sales Agreement

In 1989, Paul Taylor and I worked on a Sales Agreement form. It was presented to the CDCA, but nothing came of it. I have resusitated and modified it, and would produce it on two-part NCR paper (no messy carbons). I'd like to know what you think of 1) need, and 2) content. If you can't be at the meeting in Olds where I shall be reviewing it, write me and I'll send you a copy.

Note to all Eastern ADCA

members:

I am not able to hold a separate meeting for the six of you

you may share input for the '95 AGM in Michigan, I shall write up the results of the Olds ADCA Regional meeting, and send it to you for comment. I would appreciate your getting back to me if you have opinions which vary with or extend those expressed in Olds. I need your replies in hand not later than the end of May. Wes Patton need the Agenda items as soon as possible.

**International Conference
update**

The Dexter Cattle Society may take over the organization of the International Conference. Their first priority is to establish the level of interest: is it even worth putting on the Conference?

The original promoter was going to hold the Conference at a University with the full conference facilities, including accommodation. The registration fee would have been approx. \$500 for the three days. Some thought the fee too high, and have suggested independant accommodation (you can get good local B&B for only \$35/couple/night), and perhaps less grand facilities.

If you are interested in having a (mostly?) tax deductible Fall holiday in England in 1996 or 1997, while you attend the Conference and the Rare Breeds Show and Sale, and visit various Dexter breeders around the country, etc, etc, please contact Rosemary Fleharty, Wes Patton, or me. We'll pass the word along to the English Society.

If you have any ideas which would benefit the Conference (guest speakers, topics, revenue generators (to put towards further reducing registration costs), or ...?) please send them along, too. If enough people are interested, maybe we could also get 'group rate' air fares.

THIS IS NOT A COMMITMENT, JUST AN INDICATION OF INTEREST. DON'T DELAY: IF THE CONFERENCE IS TO GO AHEAD, THE DCS NEEDS LOTS OF TIME TO ORGANIZE A SUCCESS !!

One advantage of putting out a little update like this is that periodically I can pontificate at will:

Polled Dexters

A hot topic right now in the ADCA is the subject of polled Dexters.

To give you a broader, international outlook on polled: South Africa has been registering polled Dexters all along, but only recently started to register longlegs. There is more controversy in England over duns than there is over polled. A European country wants only polled Dexters. One of the first purebreds imported into Australia was polled. The U.S. has accepted polled Dexters (in part because every possible precaution had been taken to prove mutation, not crossbreeding), and protects its members by adding a "P" at the end of the registration number to identify all polled animals--decided at the '94 Directors meeting the morning after the AGM.

Two more purebred Dexters who appear to be genetic mutations for polled have surfaced: no previous crossbreeding, both parents horned, reputable owners. These animals will all be bloodtyped, and if they prove out, well, they are truly mutations, too.

In all things, opinions and standards change, and what was wrong last week is 'in' this week, and can be passe next week (take the bitter fight to establish Red Angus and Polled Herefords, for example). And, don't forget that up 'till now, over other issues, members of the ADCA have insisted on their right to 'do their own thing', without controls.

Maybe we need to take another look at polling. No, you can't assume polled are crossbred. Yes, it's a change. Some want it, some don't. No one is MAKING owners go polled. Live and let live, I say.

Carol Davidson

1995 Annual Meeting Update

Please Note: Change of Date

The 1995 annual meeting dates have been changed - the meeting will now held the weekend of **July 7, 8, and 9**. The main reason for the change was due to scheduling conflicts with our President and Secretary. I hope this change doesn't inconvenience anyone else, but it is important that our key leaders are able to attend.

The 1995 annual meeting will be held the weekend of July 7, 8, and 9, as stated above, in Holland, Michigan. The meeting and the Saturday evening banquet will be held at the Best Western Holland Inn. Rooms are available at a variety of motels within close proximity to the Best Western.

Best Western - (616) 396-1424 or (800) 428-7666

Blue Mill Inn - (616) 392-7073

Country Inn - (800) 456-4000 or (616) 396-6677

Days Inn - (616) 392-7001

Holiday Inn - (616) 394-0111

Knight's Court - (616) 392-1000

Super 8 Motel - (616) 392-8822

Please make reservations directly with the motel of your choice. If reserving Best Western, tell them you are with the American Dexter Cattle Association.

There are 20 rooms at the Best Western reserved for the Association. If reserving there, you **MUST** reserve your room by **June 7**, at the latest. The rates are as follows:

1 person, 1 bed - \$55.00

2 people, 1 bed - \$61.00

2 beds - \$62.00

17 and under stay free.

The tentative schedule of events for the weekend are:

Friday evening - Cookout featuring Dexter Beef at

Shamrock Acres. Pat & Linda Mitchell will be your hosts.

Saturday 8:00 a.m. - Annual Business meeting - Best Western

Lunch at Best Western

Free afternoon to take in local attractions:

Lake Michigan beaches, Windmill

Island, and many more. Or possibly visit local Dexter breeder's farms.

7:00 p.m. - Dinner Banquet with speaker to be announced.

Sunday 8:00 a.m. - Board of Directors Meeting

If we can get it properly organized, I'd like to be able to display pictures and/or have a picture contest.

More information, including costs per person, etc., will be included in the May / June issue of the Bulletin, along with a list of attractions / things to do and see in Holland.

CLASSIFIED ADVERTISING

Advertise anything that pertains to the sale of Dexter cattle and Dexter semen. The price of advertising is \$5.00 per 2" ad, per issue, or \$25.00 per year for six issues. Please make all checks payable to ADCA, and please submit them with your ad for prompt inclusion into the Bulletin. Business cards can be reprinted and are welcome.
