Dexter cattle breeders competed in their own beef breed show for the first time at the Calgary Stampede, July 12. This show was the first-ever Dexter breed competition at a major international livestock event anywhere in North America.

The breeders exhibited around 40 head. Judge Douglas Henderson, Lacombe, evaluated the entries.

HIYU Salty Rambler IV, a two-year-old bull, won the Grand Champion honors. Rambler, earlier named Senior Champion Bull, is owned by Carol Davidson, Ladysmith, B.C. Holly Hardman, Calgary, took Reserve Champion Bull award with Darby Day Fauntleroy, a yearling, who had been earlier chosen as the Junior Champion Bull.

Among the female line-up, Henderson opted for HIYU Scilla with her calf at side as the Grand Champion Female. The pair owned by Davidson, had been previously named Senior Champion Female. The Reserve Female Championship went to Davidson also. HIYU Buxom Rose had previously taken the Junior Champion Female ribbon.

Other female category winners included: Female Calf Champion — Davidson; Res. Female Calf Champion — Davidson; Res. Junior Champion Female — Davidson; and Res. Senior Champion — Donna Hutchinson, Rimby.

In the bull division, other winners included: Bull Calf Champion — Davidson; Res. Bull Calf Champion — Davidson; and Res. Junior Champion Bull — Hardman.

Davidson completed her successful day by winning the two group classes: Breeder’s Herd and Get-of-Sire. She was also chosen the Premier Breeder and Premier Exhibitor.

From the President

I was very pleased to see the turnout for the Annual Meeting. It was very surprising to see all the Directors except one at the meeting. To that Director that was absent, due to illness, we wish you a speedy recovery.

To those of you that showed a vote of confidence and elected me to the office of President, I thank you and will try to make advances in the coming year. Of course, in order to do this, it will require the cooperation of each of you.

Effective August 16, 1997 my area code will change and the present phone number of 216-659-4861 will change to 330-659-4861. It seems that north central Ohio, as well as other areas, has outgrown the phone system.

I would encourage each of you to provide articles and photographs to the Editor for publication in the Bulletin. This is the publication for the people and should encourage participation by all. Credit should be given to the author, and does not always reflect the views of the Association.

A letter was received from Fred Chesterley, resigning as Director. Please contact me with any suggestions, matters needing attention or other items that we may need to work toward solving. Remember, it is an association of the members, and we need to help those that need answers or help in resolving their situation.

James G. Johnson
President, ADCA

The following Regions will be up for election for 1997:
Regions 1,2,3,4, & 5.
Requests for individuals to run for election will be sent out in October and Ballots will be mailed out around November 1.
Also a special election in Region 11 to replace Kathy Smith who is the new Vice President—this will probably occur prior to the November election for the other regions.

1998 ADCA ANNUAL MEETING TO BE HELD IN WESTERN NORTH CAROLINA

In just ten months, July 17-18, 1998, we will again be gathered for our annual meeting. This time in Asheville, North Carolina, which might be considered as the gateway to the Great Smokey Mountains. Asheville itself lies at about 2000 feet elevation with nearby mountains over a mile. This contributes to a very mild summer climate, making this area one of the most popular summer vacation spots in the Eastern United States.

The meeting will be co-hosted by Donna Martin, Landrum, South Carolina, and myself, with arrangements being made with the Asheville Airport Holiday Inn. The motel is located one minute from the Asheville Airport and has a 24 hour complimentary limousine. For those who fly in this could eliminate the need of a rental car. Across the interstate, minutes away, is the W.N.C. Agriculture Center where members will be able to exhibit animals if they so desire. This might be beneficial to both members and to those living in the Asheville area who are not familiar with the breed.

Regarding a show, we are planning something different. Details are being worked out for a video show where professional judges will judge the animals from short video tapes supplied by the participants. This would make it possible to get a true representation of the animals in all fourteen regions without the cost or inconvenience of transporting animals long distances. The details will follow in future bulletins.

Regarding room rates, banquet costs, etc., Donna is working with the motel on this and will provide the needed information in the Nov/Dec Bulletin.

Most questions you might have will be addressed in the next two issues of the Bulletin. In the event they are not, please call Donna or myself.

Jim Moody, Director, Region 8.

1997 Officers & Directors in Calgary
THANK YOU
from the '97 AGM Committee to all those who supported the International Show at the Calgary Stampede '97.
We couldn't have done it without you. Special thanks go to Ross Cursons, Carol Davidson, Donna Hutchinson, Allyn and Rita Nelson, Cathy Nelson, Monique Schmaitz, Ruth Stone, Judy Taylor, Elena Torn, and Peter Zuchetto for entering their animals, and to Don and Natalia Carroll from the Canadian Dexter Cattle Association who brought animals from Saskatchewan. Thanks also to Holly Hardman. In all, there were almost 50 Dexters present at the Stampede.
Guest “Speakers” Bill Cranston and Dan Wilson were a popular duo Thursday and Friday. Thursday morning, Bill used a 3-month old calf to demonstrate how to trim unsightly hair, and spent the better part of the next two days trimming up most of the other Dexters at the Show. By the time we got to the Ring on Saturday morning, all the Dexters looked their best and we provided a well turned out performance. Dan, a representative of the BOS Evaluation System, did an evaluation on the trimmed calf, pointing out the various pros and cons and explaining why. This provided a real insight for many of the breeders, who reported learning a lot about what to select for. Most of the owners had Dan evaluate all their animals, too.
The Show was a terrific success, despite being rained out, and having to move into the Sheep Ring in the Agriculture Building, to complete. Several classes had more than 10 entries, and the quality of animal shown was excellent. The judge, Doug Henderson, is a well-known and respected Angus breeder. Fifteen years ago, Doug became interested in Dexters and visited many breeders in England. He also spent time in South Africa looking at Dexters there. We were very lucky to get a judge who is knowledgeable about cattle, and who is also familiar with Dexters.

As well as having the Dexter Show, the Stampede also had a Dexter at the Petting Zoo. Bev Bertsch, a Canadian Association member who lives near Calgary, regularly provides a Dexter to the Stampede for the children. This year, Bev’s cow had a lovely bull calf right at the Stampede, and the event was written up in the Calgary paper.

The Sale was quite successful, too, in that it established high prices for quality stock. Some of the reserve bids limited buyers, and there was not as much outside interest as we would have liked. However, the Sale should start a new trend in pricing animals by quality, rather than by sex and age, as has often been the case up to now.

The Stampede management went out of its way to make us feel welcome. The Stampede media department gave us maximum publicity on the air and in the newspapers. The Agriculture Manager, the Beef Chairman and the Barn Supervisor all said they had enjoyed having Dexters and hoped we would return. During the Parade of Champions, Dexters were singled out, and the announcer spent quite a bit of time telling the standing-room-only crowd about how useful and productive Dexters were.

We were very lucky to have tremendous support from other Dexter Associations, too. Both the British and the Australasian Associations sponsored banners, and Piet Wilke of South Africa donated hats, magazines and special ebony salad servers which were given away as door prizes during the AGM. We wish to extend grateful thanks to all our international Dexter supporters. Your generous contributions were very much appreciated.

The AGM was run on a positive note, and much was accomplished (refer to Rosemary’s Minutes for details). Dinner Guest Speaker, Dan Wilson (BOS Evaluation System), said we had a breed with some very special characteristics (genetic tenderness, mothering ability and fast growth), and that we should be promoting them more. He also mentioned the advantages he could see of using Dexters for crossing and suggested we work to improve our overall quality for those markets.
Evaluation of Dexters at the 1997 Stampede

by Dan Wilson

I enjoyed evaluating Dexters at the Show organized by your association at this year’s Calgary Stampede.

I was really impressed by the quality of Dexter brought to the Show. When I evaluate a herd, usually the majority of animals score between 45 and 70, with a few scoring lower, some scoring in the 70’s and 80’s, and rarely, one or two in the 90’s. At the Stampede, most Dexters scored in the 80’s or high 70’s, and there were three who scored into the 90’s, as well. Obviously, those breeders present were seriously promoting their best—this makes for an excellent Show and provides excellent publicity for the breed.

Most of your breeders appreciated the evaluation, and really LOOKED at their cattle, seeing them from a new perspective. The hardest thing for me to do was to get some of the breeders to look past the height; to see the qualities that make up a good or bad animal, regardless of size.

One of the features of the Dexter is its size. You can have your breed any height you want, but once this is established, you need to keep all body parts in proportion to that height, a miniature or cutdown version of a standard cow, if you like. Why? Because your cow must first be functional. She must be able to work, breed, feed, calve and nurse without intervention.

A few of the Dexters at the Show were out of proportion: their cannon bones were too short for the rest of their bodies. I understand that short legs are a feature in some Dexters, but you don’t want the animal to look like a basset hound. The shorter-legged Dexters at the Show were extremely good little cows. The breeder could lengthen the cannon bones by breeding to a genetically small bull with longer cannon bones—a bull in correct proportion to his height. One of the bulls there was of that type, and scored 91%. He would have scored higher, but his butt profile was a little light. By using this bull on the above mentioned cows, who had excellent butt profiles, the breeder could maintain the small stature, and work to lengthen the cannon bones while retaining the muscling.

Let me give you another example: a suckling udder is meant to be slightly above the calf, with fine teats pointing slightly forward, so a weak, wobbly calf’s nose will find it quickly and easily. Nature designed it that way for a reason—don’t try to fix it. Other udder shapes are not as functional. The exception to this is dairy clove, where teats point straight up and down, which is fine for a cow that is specially bred to be milked by machine.

Narrow muzzle, winged shoulders, high tailhead, shallow body, etc., are all good examples of what not to breed for. An evaluation system can work for you by identifying an animal’s shortcomings and strong points, so you can work to select the right mate, to improve offspring. You want Dexters to be beautiful little miniature cattle with all parts in proportion. Unless you know what to look for, or can have an evaluator show you, your eye will be distracted by the best points, you will subconsciously ignore the faults, and you won’t be selecting superior animals.

The object of having cattle is to produce an animal that will give you either milk or meat, or both. The animal must also be functional. Without those things, you won’t survive in the industry.

You have tremendous possibilities in your Dexter breed. You have more yield in your Dexters than can be seen at first glance. Many non-Dexter people have trouble looking past the size. I believe you also have little cover fat, and a higher rate of tenderness genetically than is found in many other breeds. If you are going to raise Dexters as viable farm animals, you need to give your animals a chance to live up to their full potential. You need to work on selecting superior animals and then you have to feed them well, so they produce to their genetic potential.

Tenderness is the key to the beef industry in the future. Your breed has genetic tenderness. Get your academics working on DNA for tenderness—taste testing takes too long; document a scoring system for your breed that will take into account its dual purpose attributes, start to select for superior quality. You have a really useful little animal; it deserves the best you can do for it.

Dan Wilson is an evaluator for the BOS System, a generic cattle evaluation system registered with the Canadian Livestock Records Corporation in Ottawa, Canada, and used by both purebred and commercial cattlemen. Dan was one of the Guest Speakers at the AGM held recently in Calgary.
Rocky Ridge Dexters at the Calgary Stampede

by Ruth Stone

It was great! The first day in Calgary was a bit traumatic because of shortage of sleep combined with all the excitement of rush-hour traffic, finding the grounds, waiting in line, unloading, feeding, weighing, and setting up our display. From then on it was a blast! I talked to so many people in those four days. It was wonderful meeting so many ADCA and CDCA members and putting faces to names; I will feel much more comfortable about going to general meetings in the future. I enjoyed the general meetings and hearing all the different views on the various topics presented.

We had a very good demonstration of how to improve the appearance of our animals with a minimum of grooming, by Bill Cranston, a professional fitter. He emphasized that without a good nutrition program no amount of grooming can make the animal look good. I found his discussion very interesting and it was a real eye-opener to watch other breeds of cattle being readied for their shows. I was very happy that we were not required to do all that other stuff!

The other highlight of the day was the lecture by Dan Wilson on the BOS system of evaluating cattle. This system evaluates each animal by looking at 100 different criteria under the perspectives of Function, Reproduction, Muscle and Consistency. This detailed analysis gives a very comprehensive look at the animal and it is not specific to Dexters. It applies to any breed of cattle, including cross-breds, so is useful to any producer wishing to identify potential problems as well as good/excellent animals. I do not have a livestock background but I have a brother-in-law and a nephew in commercial cow/calf production who gave me good advice and many pointers on what to look for in a good productive cow. This helped me get some good animals to start with but I am still not sure where I should go with my breeding program. I think the BOS system will allow me to improve quality and maintain productivity by making a point-by-point evaluation of each animal in my herd.

Dan evaluated the four animals I brought and three scored over 80% while the poorest one was above 75%. The potential tenderness of each animal was also determined and all scored 85% and up, so I can be sure of having tender beef if they really make me mad! The tenderness score was a surprise to me because I did not know that tenderness could be determined while the animal was still alive. I always thought it depended on how long the carcass hung, or what the temperature was while it was hanging and possibly what kind of mood the critter was in when it died. The BOS system would make it much easier to cull for a herd of tender meat animals in a world where only 1 in 4 steaks is truly edible. Awesome!

I was very pleased with the great location we enjoyed (next to the Breed Champions alley) and I think a lot of people came through our display area just because of that. This was an excellent opportunity for Dexter breeders to promote our breed and I am sure we will see more interest in our animals because of the four days spent in Calgary. Thank you Carol, for convincing me to come and risk making a fool of myself. I look forward to going again next year!

Perpetual Trophy for Grand Champion Female at the Calgary Stampede

Jonathan Stamper, an English sculptor, was commissioned by the Dexter Cattle Society (England) to create a classic Dexter cow. When Mr. Stamper learned of our Show at the Calgary Stampede, he offered one of his bronze Dexter cows as a prize. These cows are produced in limited edition, and each figurine is numbered. The cow he donated is number 63.

There is a story behind this cow; when Veronica Schofield (DCS President and head of their Technical Committee) was invited to be Guest Speaker at our AGM in Michigan several years ago, she happened to be seated during the Dinner on the chair marked for receipt of a door prize.

Continued on page 8

Cathy Nelson at the Stampede
Report by Dexter Breed Representative to the Calgary Stampede

I would like to take a few lines in the “Dexter Bulletin” to express my feelings about our first Dexter Show at the Calgary Stampede. As the breed representative on the Stampede’s Cattle Committee, I was fortunate to be involved with a group of cattlemen who encouraged, supported, and never for even one moment doubted that we could have a successful event.

The people involved in the agricultural events group of the Calgary Stampede gave us super publicity, the best spot in the barn, and help and support in every way. Thank you seems inadequate for the very positive experience of working with these people, and also all the Dexter people involved in and with the Show. I will mention one name: Carol Davidson, as this event wouldn’t have taken place without her many hours on the telephone and belief that “we can pull it off”.

Again, thank you.
And, by the way, see you next year at the Show at the Stampede. Yes, we plan on doing it again. I have already spoken with seven breeders who would like to take what they learned from this year’s show, and do better next year. This is the attitude which will make Dexters succeed! I hope to see many more breeders join us to prove Dexters belong in the serious cattle market.

Allyn Nelson,
Alberta, Dexter Breed Representative,
Beef Cattle Committee, Calgary Exhibition and Stampede

REGION 6

Just a few lines to let Region 6 members know that we had a fine Annual Meeting in Canada. I thought the meeting went real well.

Had a good turn out of Directors. Sorry that Jim Moody could not make it.

He wrote a fine article for the Bulletin. What he said was the right way to breed Dexters. He said what I have been saying all along. Through selective breeding the size can be selected without complications.

After viewing the cattle in Canada, hell they aren’t any different than the cattle in the States. I sometimes think that there’s a lot of to do’s about nothing, or a lot of nothing’s about a lot of to do’s.

There’s plenty of room for all Dexter Breeder’s both Short & Tall and when you come right down to it, we’re only talking about a foot of difference in the long and short of it. So what is a foot between friends. Ha!

Smiling Johnson
Region 6 Director

Perpetual Trophy

Continued from page 7

That door prize was an historic picture of one of the cows from the herd of Lady Loder. When Veronica returned to England, the picture was used as the base model for Mr. Stamper’s sculpture (helped along by visits to Veronica’s herd).

So, in a way, the English commission was directly influenced by our Association and its gift to Veronica.

The ‘97 AGM Committee decided that the sculpture should be awarded to the Grand Champion female (being a cow sculpture, and all). It was won by Hiyu Scilla, a 13-year-old cow belonging to Carol Davidson. Carol has now given the sculpture back to Dexter breeders by offering it as a perpetual trophy for the Grand Champion female at the Calgary Stampede.

If you can’t make it to the Stampede, and would like to own one of these sculptures, you can purchase one directly from Mr. Stamper. They are £65.50 which includes all packaging and postage. In U.S. dollars, that’s about $95, or in Canadian dollars, about $130. Mr. Stamper’s address is: Mr. Jonathan Stamper, High Head Castle Farm, Ivegill, Carlisle, Cumbria, England, CA4 OPJ. He can also be reached by telephone at 1-44-16974-73552.

**From the Editor**

I'm back! Had a wonderful time at the Calgary Stampede which can truly claim to be "the greatest outdoor show on earth", since they now have included Dexters. I'd highly recommend going if you have the chance as the surrounding scenery is gorgeous and the people were very hospitable.

Enjoyed myself, as about the only Dexter work I did while in Calgary was to squeeze all the Officers and Directors together to say cheese for a group photo. I want to thank Kathy, Palmer, and others for sending the photographs and articles for this issue to share with the members unable to attend this year's AGM and Show.

In regards to the Bulletin a few changes should be noted. It was decided to add a breeding disclaimer to warn people about the potential problems that can be incurred with a short to short mating. Also, the Board voted to only send the advertisement portion of the Bulletin to people that inquire about Dexters. This is one of those "is the milk pail half full or empty" issues, which is all I'm going to say about it for now. I'd like to thank Carol for taking out a full page advertisement which evened out the pages and provided a cover for this other publication.

Plans are to put together a "sire issue" for one of the Bulletins and we may try to do other theme oriented issues as well. Ideas and contributions are always welcome. I know new members sometimes have a lot of questions and I'd be happy to find the answers here in the Bulletin for you. If you're afraid it might be a dumb question I'll be happy to print it anonymously upon request. It might help a lot of others that have the same question.

There's still one last chance to enter the poem and photograph contest as the deadline for inclusion in the year's last issue is October 25th.

Mention should be made of the work accomplished by Sophia Stillerman and the By-Laws Committee. The proposed revisions will be mailed to members.

Jim Johnson is the new President and Kathy Smith the Vice-President. Both will be a great help to me and have been very supportive of the Bulletin. Congratulations!

Changes, flu, kids, and farm have slowed things down here a bit, which is probably for the best. The days have been warm and nights cool lately. The early morning has that hint of autumn in the air and so I hope everyone has a barn full of hay. I look forward to hearing from you.
